FRISBEECO CHARTER

Other information on http://frisbeeco.free.fr

	Environmental objectives	Organiser objectives	Player objectives	Effects	Examples
☐	Make sure all waste goes in a rubbish bin	Make rubbish bins available all over the site as well, as ashtrays	Clean-up your field after every game	Keeps the fields clean	It takes one to two years for a cigarette butt to decompose, leaving toxic waste in nature
			Do not throw cigarette butts on the ground	Avoids long lasting and uncontrolled decomposition	
☐	Effective disposal of waste through recycling	Set recycling spots on site in various places (with differents colour bags for glass, plastic, paper/cardboard) with relevant signs to help players (*)	Throw your waste in the correct rubbish bin	Recycling of waste reduces the use of natural resources (water, raw material) and saves energy	670 cans can make a recycled aluminium bike
					Each tonne of recycled plastic saves between 700 and 800 kg of oil
					Glass can be recycled infinitely
☐	Reduce the use of single-use plastics	Tell the players to bring own utensils	Bring and use your own utensils (plate, knife, fork, spoon and glass)	Reduces waste by up to 75%	Reduced plastic use saves water, oil, etc
		Set a washing-up point			
		Have reusable glasses available			
		Have some picnic kits available			
☐	Reduce carbon emissions from travelling	Use fewer cars		Reduces greehouse gas emissions	Oil consumption generates 35% of CO2 emissions
		Promote carpool	Use carpool		
		Promote public transport options	Use public transport		
☐	Reduce the use of plastic bottles	Tell the players to bring a bottle	Bring your own drink bottle	Reduces waste and pollution	
		Make water tubs available on the fields			
		Don't offer bottles of water			
☐	Awareness of the environnement	Organise exhibitions or games related to environnement awareness	Take part in the games	Public awareness	
☐	Promote local food in order to avoid transport	Buy local food according to the season	Promote local food	Reduces greenhouse gas and supports the local community	
☐	Control water consumption	Set dry-pit toilets	Promote these types of toilets	Reduces water use and produces compost	

(*) Caution : the sorting has to match with local recycling centre
